DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 3-6, 12, 16-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-6, 12, 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Miwa et al. (EP 0 959 348).

Miwa et al. teaches in Figure 2(A) and on page 3, [0015-0017], a current sensor where (22) and (24) are each a solid electrolyte; (32a) is a positive electrode and (34a) is a negative electrode. Miwa et al. teaches on page 4, [0019], that (42) and (44) are each an alumina substrate. *[Therefore teaching at least one electrode element (teaching both) disposed on the same surface of the electrolyte and with a predetermined space therebetween; an electrolyte disposed on the surface of the substrate and a substrate].*

Allowable Subject Matter

4. Claims 2, 7-11, 13-15, 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
